How to run our application:

1. **Recommended**

   If you have an Android device, you can download the file **PillMinderPlus.apk** that is in our directory :

   After downloading the file to your android device, install the application, and then you can start using it.

2. You can open the directory **Pill-Minder-Plus-main** in **Android Studio** as a project.

   OR

   The link to the code is below, and you can run it in **Android Studio** using a virtual device:

   Drive Link

   Once the project in the link has been downloaded, it should be extracted using WinRAR or another tool before being opened in Android Studio as a project.

   - To ensure that the application runs on the virtual device in Android Studio, you must download all necessary resources and libraries (such as google services) in the same versions and establish a connection with our firebase console.
